

# Optimising Commercial PV Systems

## Optimising at the Module Level

Get more power, more revenue,  
and more insight into your system  
performance

# >Improve Your Bottom Line

## HARVEST MORE POWER FROM EACH MODULE

SolarEdge mitigates power losses due to mismatch between modules, for maximum power generation from each module. With SolarEdge, weaker modules do not affect the strong ones.

### 10% module mismatch

Screenshot from the SolarEdge monitoring portal, showing power curves of 10 adjacent modules in a string with 10% mismatch between highest and lowest performing modules

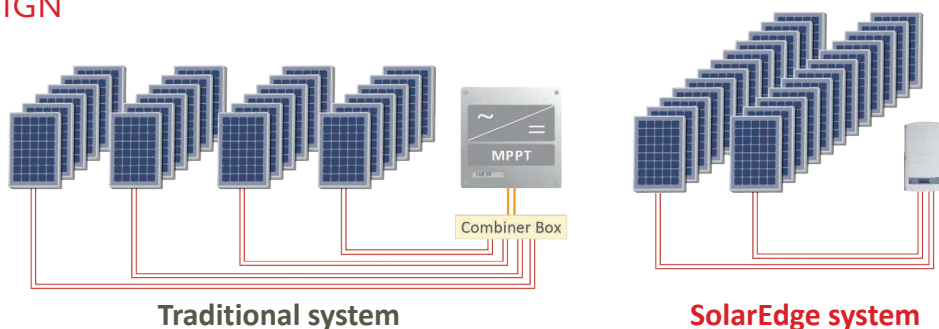

### Mismatch sources

## COST SAVING BY DESIGN

Save 50% on electrical BoS with longer strings  
26-60 modules, up to 11.25kW per string

## MORE ENERGY BY DESIGN

Increase your system capacity with more modules on the roof

Flexible site design > More modules on the roof > More power

Traditional inverter | 149.5kW DC

SolarEdge | 200kW DC  
34% more power

# >Secure Your Investment

## COST SAVING MAINTENANCE

- > Free module-level monitoring for system lifetime
- > Full control of your assets
- > Module-level performance monitoring & remote maintenance lead to:
  - Less trips to site & less time spent on site
  - Higher system uptime
- > Complete system status on your mobile (iOS or Android)

## FUTURE COMPATIBILITY AND WARRANTY

- > Low cost inverter replacement out of warranty
- > Future module compatibility (replacement & extension)
  - New modules can be utilised in the same string with old ones

## PROTECTING YOUR ASSETS

- > Providing the highest safety for installers, electricians, and firefighters
- > Better suited for future insurance requirements

# More Power • More Revenue • More Insight

## P600, P700, P800p and P800s 2 to 1 Power Optimiser

Module-level MPPT - no  
mismatch power losses

Strings of uneven length,  
modules on multiple azimuths  
& tilts

P600 compatible with SolarEdge  
inverters SE15k & larger

P700 and P800 compatible with  
SolarEdge inverters SE16k &  
larger

SafeDC™ - automatic module-  
level safety shutdown

## 15kW-33.3kW Commercial Inverters

Lower cost compared to  
traditional inverters

Superior efficiency

Small, lightweight, easy to  
install

Built-in communication  
gateway

## SolarEdge Monitoring Platform

Full visibility of system  
performance

Remote troubleshooting

## Control and Communication Gateway

Connection of multiple sensors  
to analyze system performance
